SISS 2018

Overview	
Type	Social Indicator Sample Survey
Identification	DDI-MNG-NSO-EN-SISS-2018-v1.0
Version	Production Date: 2019-08-02 Version 1.0
Series	2000, 2005, 2010, 2013, 2018
<p>Abstract</p> <p>In Mongolia, the first MICS was conducted in 1996 by the National Statistical Office (NSO) of Mongolia. Since then, the second, third and fourth MICS were conducted, respectively, in 2000, 2005 and 2010 with the joint funding support from the Government of Mongolia and UNICEF. In 2013 NSO conducted the Social Indicator Sample Survey (SISS), applying MICS5 platform in collaboration with UNICEF and UNFPA. MICS was already covering some of the SDG indicators that are household-based. After undergoing rigorous methodological and validation work to broaden the scope of the tools and include new topics that reflect SDG indicators and emerging issues in the 2030 Agenda for Sustainable Development context, MICS questionnaires in the sixth round will cover about 40 percent of household-based SDG indicators. Over the past 20 years MICS has evolved to respond to changing data needs, expanding from 28 indicators in the first round to 200 indicators in the current sixth round, and becoming a key source of data on child protection, early childhood education, and a major source of data on child health and nutrition.</p> <p>Following objectives will be carried out in order to achieve the goal:</p> <ol style="list-style-type: none"> 1. Provide child-friendly environment with granted rights to safe and healthy environment. 2. Build an environment suitable for discovery and development of talent and skills of all children 3. Cultivate mindset of listening to and respecting children's opinions in society, increase involvement of children in formulation, implementation and evaluation of policies. 4. Protect children from discrimination, pressure, violence, all forms of abuse and risks in all social environments. 5. Reduce child deprivation, including income and non-income poverty, by supporting welfare and social security for equality. 	
Kind of Data	Sample survey data [ssd]
Unit of Analysis	Household and family members

Scope & Coverage

Scope

The scope of the Social Indicator Sample survey includes:

- HOUSEHOLD: Household characteristics, household listing, education, child labour, water and sanitation, household use of insecticide treated mosquito nets, and salt iodization, with optional modules for child discipline, child disability, maternal mortality and security of tenure and durability of housing.
- WOMEN: Women's characteristics, child mortality, marriage, fertility/ birth history, maternal and new born health, attitudes towards domestic violence, tobacco and alcohol use and HIV/AIDS knowledge, with optional modules for unmet need and sexual behavior.
- MEN: Men's characteristics, marriage, fertility/ birth history, maternal and new born health, attitudes towards domestic violence, tobacco and alcohol use and HIV/AIDS knowledge, with optional modules for unmet need and sexual behavior.
- CHILDREN: Children's characteristics, birth registration and early learning, vitamin A, breastfeeding, immunization, and with an optional module for child development.

Time Period(s)	2018
Countries	Mongolia
Geographic Coverage	

To derive baseline estimates for the Government of Mongolia and UNICEF Country Programme 2017-2021 geographic focus areas as well as previous and featured focus areas, more sample will be allocated to Bayan-Ulgii, Gobi-Altai, Zavkhan, Bayankhongor and Khuvsgul provinces and Bayanzurkh, Nalaikh districts in Ulaanbaatar. Also, as UNFPA Country office request, more sample will be allocated to Umnugovi province.

Universe

The survey covered all household members (usual residents), all women aged 15-49 years resident in the household, all men aged 15-49 years resident in the household, all children aged 5-17 years resident in the household and all children aged 0-4 years (under age 5) resident in the household.

Producers & Sponsors

Primary Investigator(s)	National Statistical Office, SGH
Funding Agency/ies	United Nations Children's Fund (UNICEF) , Funding of survey implementation United Nations Population Fund (UNFPA) , Funding of survey implementation

Sampling

Sampling Procedure

The Mongolia Social Indicator Sample Survey (SISS) is household based, and the last-stage sample units are individual households.

The sample for the SISS 2018 was designed to provide estimates for a large number of indicators on the situation of children and women and men at the national, urban and rural areas, five regions (Eastern, Western, Central, Khangai and Ulaanbaatar) and eight target provinces/ districts (provinces of Bayan-Ulgii, Bayankhongor, Gobi-Altai, Zavkhan, Umnugovi, Khuvsgul and districts of Bayanzurkh and Nalaikh).

A sample of 14,500 households were selected country-wide. The sample size (number of households) within each region was first determined by applying the square root allocation. The sample size was then adjusted for individual provinces and districts that are domains.

A two-stage, stratified cluster sampling approach was used for the selection of the survey sample. The sampling frame was based on the 2017 Population and Household Database (PHDB). The primary sampling units (PSUs) selected at the first stage were the enumeration areas (EAs) defined for this survey. The EAs were selected systematically with probability proportional to size within each stratum, from the full list of EAs in the frame. After a household listing was carried out in the sampled EAs during the period of August - September 2018, a systematic sample of 25 households was selected from each PSU.

Weighting

The SISS sample is not self-weighting, partly because different sampling fractions were used in each stratum. For this reason, sample weights were calculated and used in the subsequent analyses of the survey data.

After the completion of fieldwork, response rates were calculated for each sampling stratum. These were used to adjust the sample weights calculated for each cluster. Response rates in the SISS are shown in Table SR.1.1 in this report.

The non-response adjustment factors for the individual women and under-5 questionnaires were applied to the adjusted household weights. Numbers of eligible women and under-5 children were obtained from the list of household members in the Household Questionnaire for households where interviews were completed.

The weights for the questionnaire for individual men were calculated in a similar way. In this case the number of eligible men in the list of household members in all the SISS sample households in the stratum was used as the numerator of the non-response adjustment factor, while the number of completed questionnaires for men in the stratum was obtained from the 50 percent subsample of households. Therefore, this adjustment factor includes an implicit subsampling weighting factor of 2 in addition to the adjustment for the non-response to the individual questionnaire for men.

In the case of the questionnaire for children age 5-17 years, in each sample household, one child was randomly selected from all the children in this age group recorded in the list of household members. The household weight for the children age 5-17 years is first adjusted based on the response rate for this questionnaire at the stratum level. Once this adjusted household weight is normalised as described below, it is multiplied by the number of children age 5-17 years recorded in the list of household members. Therefore, the weights for the individual children age 5-17 years will vary by sample household. This weighting of the data for the children age 5-17 years old is implemented in the tabulation programs for the corresponding tables.

For the water quality testing (both in household and at source) a subsample of 5 households was selected from the 25 SISS sample households in each sample cluster.

The SISS full (raw) weights for the households were calculated by multiplying the inverse of the probabilities of selection by the non-response adjustment factor for each stratum. These weights were then standardised (or normalised), one purpose of which is to make the weighted sum of the interviewed sample units equal to the total sample size at the national level. Normalisation is achieved by dividing the full sample weights (adjusted for nonresponse) by the average of these weights across all households at the national level. This is performed by multiplying the sample weights by a constant factor equal to the unweighted number of households at the national level divided by the weighted total number of households (using the full sample weights adjusted for non-response). A similar standardisation procedure was followed in obtaining standardised weights for the individual women, men, under-5 and 5-17 years old children, and water quality testing. Adjusted (normalised) household weights varied between 0.1710 and 4.2085 in the 580 sample enumeration areas (clusters).

Data Collection	
Data Collection Dates	Everyday: start 2018-09-20 Everyday: end 2018-12-20
Time Period(s)	Everyday: start 2018-09-20 Everyday: end 2018-12-20
Data Collection Mode	Computer Assisted Personal Interview [capi]
Data Collection Notes	
<p>PRE-TEST PAPI pre-testing was carried out in five locations, namely in Sukhbaatar soum, Khushaat soum in Selenge aimag, and in Nalaikh district of Ulaanbaatar during May 2018. Based on the results of the pre-test, modifications were made to the wording and coherence of the questions in questionnaires.</p> <p>TRAINING Training for the fieldwork was conducted for 31 days from August 20th to September 19th, 2018. Training included lectures on interviewing techniques and the contents of the questionnaires, and mock interviews between trainees to gain practice in asking questions. Participants first completed full training on paper questionnaires for 20 days, followed by a 10-day training on the CAPI application.</p> <p>The trainees spent 4 days in field practice in total with 2 days of paper-based questionnaire and 2 days of data collection using tablets. The training agenda was based on the standard MICS6 training agenda. Complementary trainings such as disaster/first-aid training, dog aggression and communication, and team psychology were added to the agenda in view of country-specific reasons.</p> <p>Trainees received dedicated training on anthropometric measurements and water quality testing for a total of 4 days, including one day of field practice on each of the two tasks.</p> <p>Field Supervisors attended additional training on the duties of team supervision and responsibilities.</p> <p>Plan of survey The data were collected by 19 teams; each was comprised of 5 interviewers (3 female and 2 male interviewers, male interviewers also operated as measurers) 2 drivers and a supervisor. Fieldwork was conducted from September 21st in Ulaanbaatar and from October 3rd in local area until December 28th, 2018 lasting for 99 days.</p> <p>Technology used to survey Data was collected using tablet computers running the Windows 10 operating system, utilising a Bluetooth application for field operations, enabling transfer of assignments and completed questionnaires between supervisor and interviewer tablets.</p>	
Data Collector(s)	National Statistical Office (NSO) , SGH

Data Processing & Appraisal

Data Editing

Data were received at the NSO's data server via the transfer application on the supervisors' tablets. Data from interviewers are batched on the supervisors' application via Bluetooth transfer, which is also used by supervisors for checking for

irregularities. Whenever logistically possible, synchronisation was done daily. The central office communicated application updates to field teams through this system.

Following the completion of fieldwork, data were edited according to editing process described in detail in the standard MICS6 Guidelines for Secondary Editing.

Data were analysed using the Statistical Package for Social Sciences (SPSS) software, Version 24.0. Model syntax and tabulation plan developed by UNICEF were used with customisation for additional country-specific analyses.

Files Description

Dataset contains 9 file(s)

Household	
# Cases	14500
# Variable(s)	208
File Content A household information which was used to collect basic demographic information on all de jure household members (usual residents), and the dwelling	

Household List	
# Cases	49839
# Variable(s)	67
File Content All information of household members	

Men	
# Cases	5513
# Variable(s)	242
File Content An information for individual men administered in every second household to all men age 15-54 years	

Women	
# Cases	11737
# Variable(s)	448
File Content An information for individual women administered in each household to all women age 15-49 years	

Fertility, birth history	
# Cases	22935
# Variable(s)	67
File Content An information for individual women's fertility/birth history in each household to all women age 15-49 years	

Abortion	
# Cases	594
# Variable(s)	41
File Content An information for individual women's abortion in each household to all women age 15-49 years	

Child under 5	
# Cases	6269
# Variable(s)	441
<u>File Content</u> An under-5 information, administered to mothers (or caretakers)for all children under 5 living in the household	

Child age 5-17	
# Cases	7628
# Variable(s)	275
<u>File Content</u> An information for children in each household to all children age 5-17 years	

Cluster	
# Cases	580
# Variable(s)	8

Variables List

Variables Description

Dataset contains 1797 variable(s)

File : Household			
# HH1: Cluster number			
Information	[Type= continuous] [Format=numeric] [Range= 1173-295200] [Missing=*]		
Statistics [NW/ W]	[Valid=14500 /-] [Invalid=0 /-] [Mean=146838.757 /-] [StdDev=85253.624 /-]		
# HH2: Household number			
Information	[Type= continuous] [Format=numeric] [Range= 1-25] [Missing=*]		
Statistics [NW/ W]	[Valid=14500 /-] [Invalid=0 /-] [Mean=13 /-] [StdDev=7.211 /-]		
# HH3: Interviewer number			
Information	[Type= continuous] [Format=numeric] [Range= 11-205] [Missing=*]		
Statistics [NW/ W]	[Valid=14500 /-] [Invalid=0 /-] [Mean=108.572 /-] [StdDev=59.041 /-]		
# HH4: Supervisor number			
Information	[Type= continuous] [Format=numeric] [Range= 10-200] [Missing=*]		
Statistics [NW/ W]	[Valid=14500 /-] [Invalid=0 /-] [Mean=105.534 /-] [StdDev=59.031 /-]		
# HH5Y: Year of interview			
Information	[Type= discrete] [Format=numeric] [Range= 2018-2018] [Missing=*]		
Statistics [NW/ W]	[Valid=14500 /-] [Invalid=0 /-] [Mean=2018 /-] [StdDev=0 /-]		
Value	Label	Cases	Percentage
2018		14500	100.0%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# HH5M: Month of interview			
Information	[Type= discrete] [Format=numeric] [Range= 9-12] [Missing=*]		
Statistics [NW/ W]	[Valid=14500 /-] [Invalid=0 /-]		
Value	Label	Cases	Percentage
9		1856	12.8%
10		5132	35.4%
11		5862	40.4%
12		1650	11.4%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			
# HH5D: Day of interview			
Information	[Type= continuous] [Format=numeric] [Range= 1-31] [Missing=*]		
Statistics [NW/ W]	[Valid=14500 /-] [Invalid=0 /-] [Mean=16.454 /-] [StdDev=8.35 /-]		
# HH6A: Area			
Information	[Type= discrete] [Format=numeric] [Range= 1-4] [Missing=*]		
Statistics [NW/ W]	[Valid=14500 /-] [Invalid=0 /-]		
Value	Label	Cases	Percentage
1	CAPITAL CITY	3400	23.4%
2	AIMAG CENTER	3950	27.2%
3	SOU M CENTER	3150	21.7%
4	RURAL AREA	4000	27.6%
<i>Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.</i>			

File : Household

HH7: Region

Information [Type= discrete] [Format=numeric] [Range= 1-5] [Missing=*]

Statistics [NW/ W] [Valid=14500 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Western	3700	25.5%
2	Khangai	3000	20.7%
3	Central	2400	16.6%
4	Eastern	2000	13.8%
5	Ulaanbaatar	3400	23.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH8: HH selected for Questionnaire for Men

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=14500 /-] [Invalid=0 /-]

Literal question Is the household selected for Questionnaire for Men?

Value	Label	Cases	Percentage
1	YES	6960	48.0%
2	NO	7540	52.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH9: HH selected for Water Quality Testing

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=14500 /-] [Invalid=0 /-]

Literal question Is the household selected for Water Quality Testing?

Value	Label	Cases	Percentage
1	YES	2900	20.0%
2	NO	11600	80.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH10: HH selected for blank testing

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=14500 /-] [Invalid=0 /-]

Literal question Is the household selected for blank testing?

Value	Label	Cases	Percentage
1	YES	580	4.0%
2	NO	13920	96.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH11H: Start of interview - Hour

Information [Type= continuous] [Format=numeric] [Range= 0-23] [Missing=*]

Statistics [NW/ W] [Valid=14500 /-] [Invalid=0 /-] [Mean=14.487 /-] [StdDev=3.503 /-]

Literal question Record the time

HH11M: Start of interview - Minutes

Information [Type= continuous] [Format=numeric] [Range= 0-59] [Missing=*]

Statistics [NW/ W] [Valid=14500 /-] [Invalid=0 /-] [Mean=29.532 /-] [StdDev=17.447 /-]

File : Household

HH11M: Start of interview - Minutes

Literal question Record the time

HH12: Consent

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=14500 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	YES	13798	95.2%
2	NO / NOT ASKED	702	4.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH46: Result of HH interview

Information [Type= discrete] [Format=numeric] [Range= 1-96] [Missing=*]

Statistics [NW/ W] [Valid=14500 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	COMPLETED	13798	95.2%
2	NO HOUSEHOLD MEMBER AT HOME OR NO COMPETENT RESPONDENT AT HO	138	1.0%
3	ENTIRE HOUSEHOLD ABSENT FOR EXTENDED PERIOD OF TIME	258	1.8%
4	REFUSED	61	0.4%
5	DWELLING VACANT OR ADDRESS NOT A DWELLING	114	0.8%
6	DWELLING DESTROYED	6	0.0%
7	DWELLING NOT FOUND	44	0.3%
96	OTHERS (specify)	81	0.6%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH13H: End of interview - Hour

Information [Type= continuous] [Format=numeric] [Range= 0-23] [Missing=*]

Statistics [NW/ W] [Valid=13798 /-] [Invalid=702 /-] [Mean=14.663 /-] [StdDev=3.447 /-]

HH13M: End of interview - Minutes

Information [Type= continuous] [Format=numeric] [Range= 0-59] [Missing=*]

Statistics [NW/ W] [Valid=13798 /-] [Invalid=702 /-] [Mean=29.359 /-] [StdDev=17.291 /-]

HH14: Language of the Questionnaire

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=13798 /-] [Invalid=702 /-]

Value	Label	Cases	Percentage
1	MONGOLIAN	13379	97.0%
2	KAZAKH	419	3.0%
Sysmiss		702	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH15: Language of the Interview

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=13798 /-] [Invalid=702 /-]

File : Household

HH15: Language of the Interview

Value	Label	Cases	Percentage
1	MONGOLIAN	13091	94.9%
2	KAZAKH	707	5.1%
Sysmiss		702	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH16: Native language of the Respondent

Information	[Type= discrete] [Format=numeric] [Range= 1-6] [Missing=*]
Statistics [NW/ W]	[Valid=13798 /-] [Invalid=702 /-]

Value	Label	Cases	Percentage
1	MONGOLIAN	12808	92.8%
2	KAZAKH	983	7.1%
3	TUVA	7	0.1%
6	OTHER (specify)	0	
Sysmiss		702	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH17: Translator used

Information	[Type= discrete] [Format=numeric] [Range= 1-3] [Missing=*]
Statistics [NW/ W]	[Valid=13798 /-] [Invalid=702 /-]

Value	Label	Cases	Percentage
1	YES, ENTIRE QUESTIONNAIRE	347	2.5%
2	YES, PART OF QUESTIONNAIRE	49	0.4%
3	NO, NOT USED	13402	97.1%
Sysmiss		702	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH26A: Rank number of the selected child

Information	[Type= discrete] [Format=numeric] [Range= 1-6] [Missing=*]
Statistics [NW/ W]	[Valid=7628 /-] [Invalid=6872 /-]

Value	Label	Cases	Percentage
1		5521	72.4%
2		1656	21.7%
3		362	4.7%
4		77	1.0%

97	INCONSISTENT	0	
Sysmiss		6872	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH26C: Child's age

Information	[Type= discrete] [Format=numeric] [Range= 5-17] [Missing=*]
Statistics [NW/ W]	[Valid=7628 /-] [Invalid=6872 /-]

Value	Label	Cases	Percentage
5		834	10.9%
6		827	10.8%
7		767	10.1%
8		660	8.7%
9		658	8.6%
10		629	8.2%
11		580	7.6%
12		469	6.1%
13		485	6.4%
14		495	6.5%
15		417	5.5%
16		471	6.2%
17		336	4.4%
Sysmiss		6872	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH33: Consent for interview girls 15-17

Information	[Type= discrete] [Format=numeric] [Range= 1-3] [Missing=*]
Statistics [NW/ W]	[Valid=973 /-] [Invalid=13527 /-]

Value	Label	Cases	Percentage
1	YES FOR ALL GIRLS AGE 15-17	949	97.5%
2	NO FOR AT LEAST ONE GIRL AGE 15-17	24	2.5%
3	NO FOR ALL GIRLS AGE 15-17	0	
Sysmiss		13527	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

File : Household

HH39: Consent for interview boys 15-17

Information [Type= discrete] [Format=numeric] [Range= 1-3] [Missing=*]

Statistics [NW/ W] [Valid=481 /-] [Invalid=14019 /-]

Value	Label	Cases	Percentage
1	YES FOR ALL BOYS AGE 15-17	469	97.5%
2	NO FOR AT LEAST ONE BOY AGE 15-17	11	2.3%
3	NO FOR ALL BOYS AGE 15-17	1	0.2%
Sysmiss		14019	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH44: Consent for Water Quality Testing

Information [Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

Statistics [NW/ W] [Valid=2764 /-] [Invalid=11736 /-]

Value	Label	Cases	Percentage
1	YES, PERMISSION IS GIVEN	2745	99.3%
2	NO, PERMISSION IS NOT GIVEN	19	0.7%
Sysmiss		11736	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HH47: Respondent to HH questionnaire

Information [Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]

Statistics [NW/ W] [Valid=13798 /-] [Invalid=702 /-]

Value	Label	Cases	Percentage
1		6843	49.6%
2		6278	45.5%
3		477	3.5%
4		125	0.9%

18	UZEMCHIN	31	0.2%
96	OTHER (specify)	72	0.5%
98	DK	42	0.3%
99	NO RESPONSE	1	0.0%
Systemmiss		702	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HC1A: Religion of household head

Information	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]
Statistics [NW/ W]	[Valid=13798 /-] [Invalid=702 /-]
Literal question	Does (name of the head of household from HL2) hold any religion?

Value	Label	Cases	Percentage
1	BUDDHIST	6903	50.0%
2	CHRISTIAN	144	1.0%
3	MUSLIM	1019	7.4%
4	SHAMANIST	331	2.4%
6	OTHER (specify)	15	0.1%
7	NO RELIGION	5344	38.7%
8	DK	40	0.3%

File : Household

HC1A: Religion of household head

Value	Label	Cases	Percentage
9	NO RESPONSE	2	0.0%
Sysmiss		702	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HC1C: Language of household head

Information	[Type= discrete] [Format=numeric] [Range= 1-6] [Missing=*]
Statistics [NW/ W]	[Valid=13798 /-] [Invalid=702 /-]
Literal question	Type of accommodation of the household.

Value	Label	Cases	Percentage
1	GER	6297	45.6%
2	APARTMENT, CONDOMINIUM	2395	17.4%
3	CONVENIENT SINGLE-FAMILY HOUSE	654	4.7%
4	SINGLE-FAMILY HOUSE	4278	31.0%
5	PUBLIC ACCOMODATION, DORMITORY	140	1.0%
6	OTHER (specify)	34	0.2%
Sysmiss		702	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HC1D: Number of ger walls

Information	[Type= discrete] [Format=numeric] [Range= 4-99] [Missing=*]
Statistics [NW/ W]	[Valid=6297 /-] [Invalid=8203 /-]
Literal question	How many walls does your ger have?

Value	Label	Cases	Percentage
4		1649	26.2%
5		3607	57.3%
6		909	14.4%
8		128	2.0%
9		2	0.0%
10		1	0.0%
11		1	0.0%
99	NO RESPONSE	0	
Sysmiss		8203	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HC1E: Material of ger floor

Information	[Type= discrete] [Format=numeric] [Range= 11-99] [Missing=*]
Statistics [NW/ W]	[Valid=6297 /-] [Invalid=8203 /-]
Literal question	What is the material of the floor of your ger?

Value	Label	Cases	Percentage
11	EARTH / SAND	3979	63.2%
12	DUNG	264	4.2%
21	WOOD, TIMBER	1590	25.3%
34	CEMENT	385	6.1%
96	OTHER (specify)	79	1.3%

File : Household

HC1E: Material of ger floor

Value	Label	Cases	Percentage
99	NO RESPONSE	0	
Sysmiss		8203	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HC1F: Ger roof single or multiple layered during winter season

Information	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]
Statistics [NW/ W]	[Valid=6297 /-] [Invalid=8203 /-]
Literal question	Is the roof of your ger single or multiple layered?

Value	Label	Cases	Percentage
1	SINGLE	1528	24.3%
2	MULTIPLE	4758	75.6%
9	NO RESPONSE	11	0.2%
Sysmiss		8203	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HC1G: Ger exterior cover single or multiple layered during winter season

Information	[Type= discrete] [Format=numeric] [Range= 1-9] [Missing=*]
Statistics [NW/ W]	[Valid=6297 /-] [Invalid=8203 /-]
Literal question	Are exterior cover of your ger single or multiple layered?

Value	Label	Cases	Percentage
1	SINGLE	1447	23.0%
2	MULTIPLE	4831	76.7%
9	NO RESPONSE	19	0.3%
Sysmiss		8203	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

HC1H: Sq. meters of dwelling

Information	[Type= discrete] [Format=numeric] [Range= 5-999] [Missing=*]
Statistics [NW/ W]	[Valid=7501 /-] [Invalid=6999 /-]
Literal question	How many square meters does your accommodation have?

Value	Label	Cases	Percentage
5		1	0.0%
6		3	0.0%
8		5	0.1%
9		3	0.0%
