Data Collection Mode

Face-to-face [f2f] For the data collection of this survey, we used a modern technology that fully automated paper technology is tablet technology. In the first stage of data collection, the enumerators visited the selected households, met with each member aged 15 and over /face to face/ and through conversation and questioning by tablet. After data collection, supervisors and enumerators are checking, encode and transmit to the NSO's central server via the Internet. Upon receiving data in a central server, a survey team in NSO made logical and other checks for all data transmitted from the supervisors of local units and additional clarifications were received from the enumerators through the supervisors of local units.
